Grayteq

DLP Monitor

Monitor valuable data in real-time to stay ahead of risks

Safeguarding valuable and sensitive data is on everyone's mind in our days. Accidental or intentional disclosure of data due to human error, lost devices and misplaced data storage devices are security challenges for nearly every IT security personnel around the world. Every component of Grayteq Data Loss Prevention Solutions family is designed with the firm will to help organizations protect their valuables against every form of data loss. Grayteq DLP's core element Grayteq DLP Monitor provides you with the capability of monitoring, logging and analyzing every interaction to your corporate data. To see your data usage reality as is. By using real-time activity log time-stamp based ordering, analytics and counter-actions are easy-to-make. This infrastructure and technology minimize the workload for your security team, help stay in compliance and safeguard your intellectual property and vital assets.

Monitor, Track and Log on your data

No matter in which business segment your company is, you need the visibility to identify sensitive information over any storage, any application, any protocol, any port, and in any form—with. With Grayteq DLP Monitor you can real-time monitor, track, gather and with Report & Audit report and analyze all your sensitive data across your entire organization to find how your data is stored, how is used and how it travels between your users, your devices and to other organizations. Grayteq DLP's high-performance, activity logging and policy enforcing endpoint software, Grayteq DLP Agent detects all file interactions traversing any port or protocol, help you uncover threats, malicious intents and unintentional but wtill harmful attempts to your data and take action to protect your organization against data loss.

Key Advantages

- Full-time user activity log and monitor.

- All logs are timestamped on the place of creation.

- Unmodifiable log in an indelible fashion.

- Legally accepted proof of any policy violation attempts.

- Real-time alert about any unwanted or harmful user actions.

- Various activity and security reports in clicks or by timely fashion.

- Full range storage data flow control inbound and outbound.

- Session-based reports about removable media data exchange.

- Security server logging to help real-time maintenance and technical support.

- Log Grayteq admins' activities for "watching the watchers".

Grayteq DLP Features

DLP Monitor	Rights Management	Data Quarantine	App Management
Endpoint Protection	Encryption for DLP	Intrusion Prevention	Report & Audit

Grayteq

Real-time protection

Log and Analyze interactions to information right on the spot when initiated, analyze it and find out if it breaches any upholding security policy, let it go, if not or enforce policy, generate a time-stamped, evidential log about it, transfer to the Grayteq Security Server application and if necessary, alert IT security personnel with all details of the attempt. With more than 150 prebuilt log filtering rules in a Log Filter factory default policy, logging of all security-irrelevant actions can be prevented right on the endpoint, easing the network load of log transfer. Grayteq DLP's industry standard security policies are also delivered as prebuilt rules and policies to help your security personnel understand what aspects of data security are handled first, then serve as templates for additional policies tailor-made to your specific organizational circumstances and data use habits.

Discover Risks Not Previously Thought of

Through factory preset log filtration, file classification and labelling via Grayteq Classifier, monitoring and logging all access and interactions to information of every storage network-wise —not just information that matches its real-time rules— Grayteq DLP Monitor allows you to quickly leverage historical information to understand what data is sensitive, how it is being used, who is using it and where it is going. Additionally, you can perform thorough investigation and inspection of user file activities to recognize risk events and data exposure that may not have been previously even thought of.

Classify Your Data

In addition to Grayteq DLP Monitor, Grayteq solution family provides you with the capability of file classification with Grayteq Classifier. Your Microsoft Office files and Adobe PDF can be automatically, or single-click-manually be classified by Grayteq Classifier, or during their creation by Classifier for Office in order to establish automatic policy enforcement on classified files. By combining these classifications with Grayteq DLP's policy enforcement capabilities, your corporate data protection receives an additional layer with the least required user-involvement and effort.

Perform Incident Forensics

Grayteq DLP Monitor has one of the most intuitive and powerful, drill-down type log analytics interface that enables your IT security administrators to visually drill into the depth of activity logs and find a specific event, a perpetrator, a device, a file, a timeframe, a port, a protocol, a screenshot and more in even the largest amount of log information in clicks or with Grayteq DLP Report and Audit features, create ad-hoc and automated reports, board-ready incident and security analytics or even more with Grayteq DLP Dashboard.

Next Step

About us

Grayteq was born from a firm commitment to provide superior data security products to companies and people all over the world. Since its inception, our company has passed down and expanded on its traditional strengths as an IT security software manufacturing company. Grayteq's approach to data loss prevention massively differs from any other data loss prevention manufacturers' approach in numerous aspects. Our slogan well represents our way of thinking about data loss and applicable prevention measures to stop it.
